

3. fibre to fabrics

5-7-2021

Q1 What are fibres?

→ Fibres are thin strands that are spun together to make thread.

Q2 Differentiate between Natural fibre & Synthetic fibres

→ Natural fibre - Fibres that are obtained from plants & animals are called natural fibres. For example - cotton, wool, silk, jute, hemp, kapok & flax.

Synthetic fibre - Fibres that are made by human beings using chemicals are called synthetic fibre. For example rayon, Nylon, polyester & acrylic, etc. These are cheaper & stronger.
