Chapter or Lesson No. 7... Climate AND Adaptation...

Question No. 1... Distinguish Between WEATHER AND CLIMATE ??

⇒ ⇒ Weather...

(A) weather is the current Atmospheric condition at a Place Based on the Temperature, Rainfall, Wind, Humidity, And other factors...

(B) weather is observed over a short Period of time and may vary from Day-to-Day or even from Hour to Hour...

(C) we can observe if the weather is Rainy, Windy, Sunny or cloudy By simply observing our surroundings...

⇒ ⇒ Climate...

(A) Climate is the General Pattern of weather condition that are observed in a Region over a long Period of Time...

(B) Unlike weather, Climate Does Not vary over short Periods of Time But Relatively unchanged over a longer time span of a few years...

(C) The changes in climate at a Particular Place are detectable only if weather Patterns, including the different variations in weather, are observed over long time spans such as Hundred of years...
