

Plants Need Water

Learning Resource-23

Dear Educator!

Keep 2 potted plants in the classroom. Make me water only one of them regularly for a few days. Let me observe what happens to both the plants. (The one that is not watered regularly will wither.) Explain that plants, too, need water to grow and be healthy. Tell me to colour the plant that has grown as a result of regular watering. Make me cross out the withered plant. (Allow me to colour it if I want.)

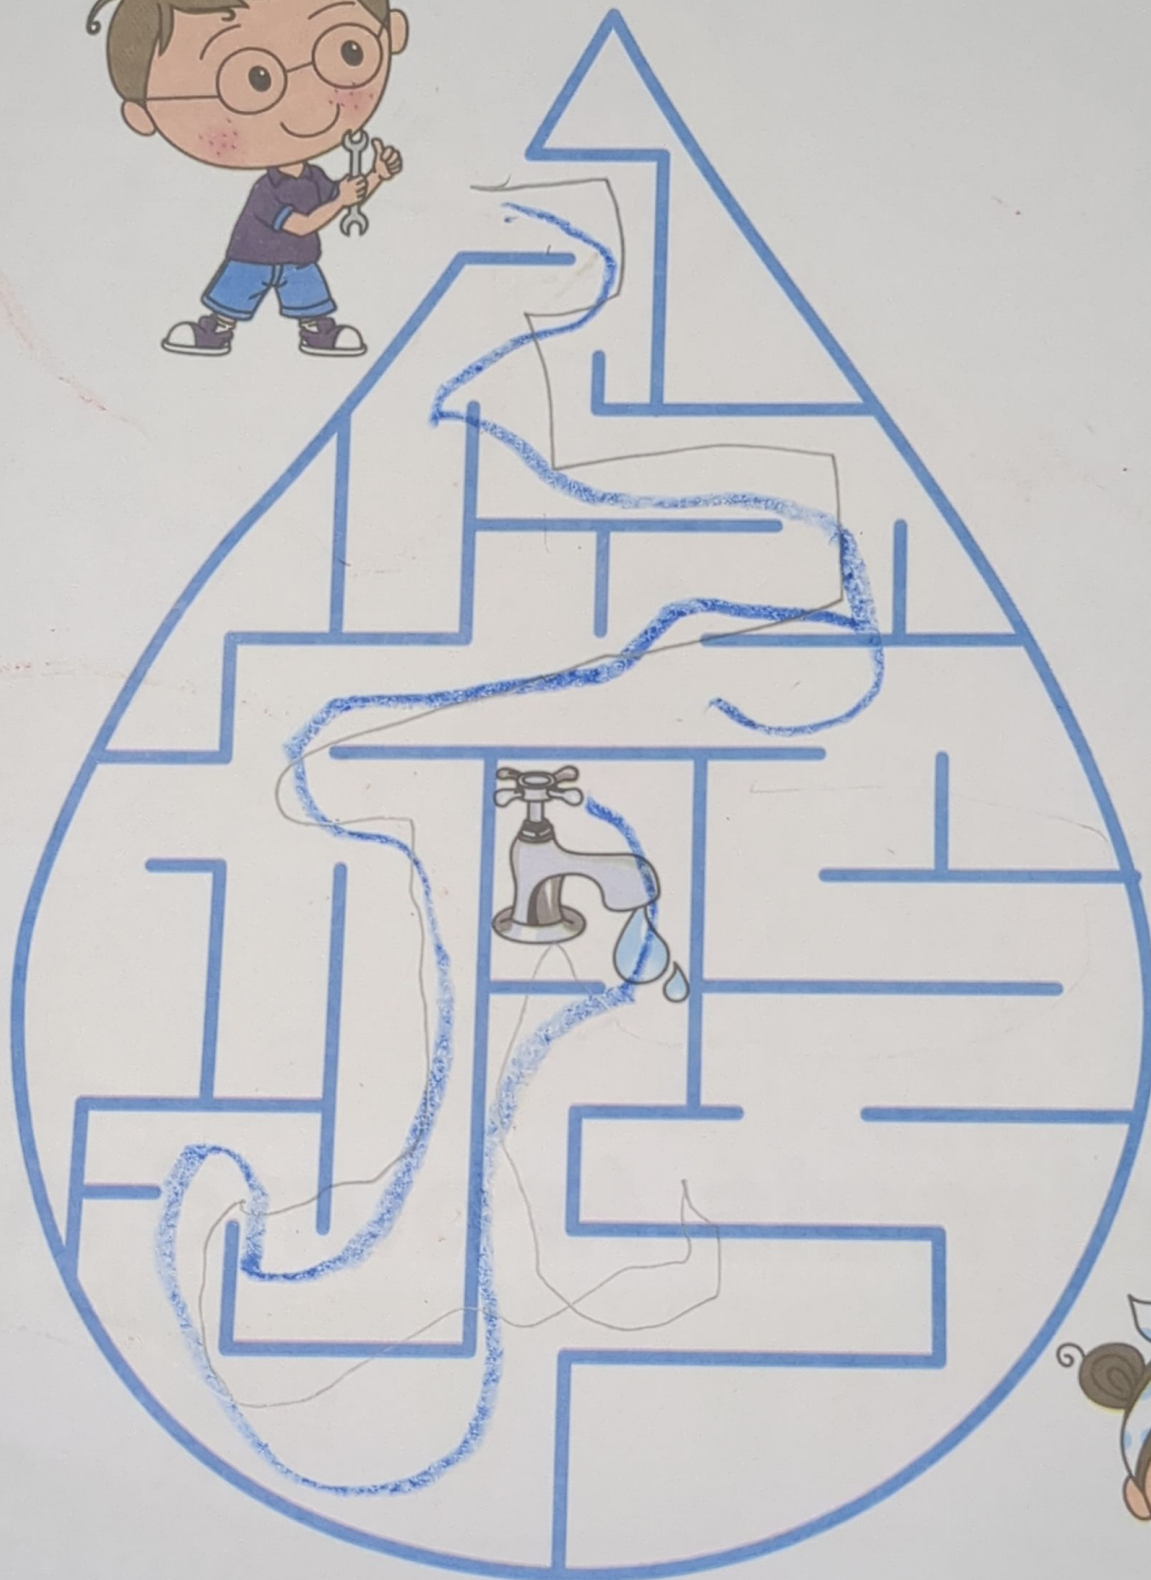

Let's Save Water

Learning Resource-25

Help Hydro turn off the leaky faucet.

Dear Educator!

- ✓ Tell me that it is important to save water because it helps plants, animals, and humans live.
- ✓ Explain that we can help save water by making sure that the faucet (tap) is turned off and not dripping.
- ✓ Help me trace the path to help Hydro reach the leaky faucet.
