- (4) The default sprite has two costumes and one preloaded sound.
- (5) The stage area shows the output of the program.

Q2. Answer the following in brief.

- (1) Write a short note on the use of Scratch programming and its main element.

Ans: Scratch is a programming language

that allows you to create programs & online projects using a block-like interface. The main element in Scratch is a 'sprite'. A sprite is a graphic that you can give commands to.

- (2) What are the main parts of a Scratch window?

Ans: Block drawers, block Palette, Scripts

area, stage, Sprite list, Menu bar, costumes tab, Sound tab, scripts tab

- (3) Explain the Stage area in the Scratch window.

Ans: It is the area where you place

your sprites and features the result of your program when you execute it

(4) Give the various options to add a sprite to your Scratch program.

Ans: Choose a sprite →

Click this option to open the sprite Library. You can click on any category & select one of the various sprite available. To insert a sprite, simply select it & click ok.

(5) Write down the steps to save your project in Scratch. Also mention the extension with which it will be saved.

Ans: • Click the file option on the menubar → the file menu appears.

- Click the option 'save to your computer'.
- Select the folder in the dialog box.
- Type the filename with extension '.sb3' in the filename textbox & click save.
