Q1. Answer the following

Q1. Write down one important function of roots?

Ans:- The root holds the plant firmly to the soil

Q2. Write down one important thing that the stems do?

Ans:- The stem passes food and water to all parts of the plant

Q3. What do you mean by stomata? What is its role?

Ans:- Leaves also have many tiny holes called stomata on their lower surface. These holes help a plant to breathe

Q4. Define chlorophyll and state its function?

Ans:- Chlorophyll is a green coloured substance present in the leaves. It traps sunlight
