

Ans. the following are the uses of soil.

Q1. How is soil formed?

Ans. Soil is formed when rocks break down and animal matter, also mixes with tiny rocks and soil.

Q2. How are dead leaves and insects useful to us?

Ans. Dead leaves help in making manure. Insects such as earth worms gobble it and make it useful for the soil and make soil loose.

Q3. Earth worms and ants live in the soil. Where do they get air to breathe?

Ans. Soil contains air and hence the earthworms and ants living in the soil can breathe.
