

Suresh Angadi Education Foundation's

Angadi International School

(Affiliated CBSE, New Delhi)

(2025-26)

Grade: VI

Subject: SOCIAL STUDIES (Reference Worksheet)

16/08/25

The Value of Work

1. Explain how work shapes a person's dignity and self-respect.
2. Discuss why both paid and unpaid work are important for society's progress.
3. Describe a situation in which teamwork could make a difficult task easier.
4. Highlight the link between hard work and the values we learn in life.
5. Show how rural and urban work differ, yet both are essential for the country's economy.
6. Analyse the impact on a community if people stop doing voluntary or non-economic work.
7. Evaluate how honesty and dedication can improve the quality of any work.
8. Relate a personal or family experience where hard work led to a meaningful result.
9. Illustrate with an example how work done with care benefits both the worker and others.
10. Interpret the idea that "No work is small if done with sincerity."

Unity in Diversity

1. Describe how the freedom struggle of India demonstrated unity among people of diverse regions, castes, and religions.
2. Describe how different religions, languages, and festivals in India reflect the idea of 'Unity in Diversity'. Give suitable examples.
3. Explain why Unity in Diversity is important for the progress and strength of India.
4. Discuss how art, music, and dance forms from different states of India add to our cultural richness and promote national integration.
5. Describe how geographical and cultural differences in India contribute to the richness of our Unity in Diversity.
6. Explain why respecting diversity is important for maintaining peace and harmony in a large and democratic country like India.
7. India is known for its 'Unity in Diversity'. Explain this statement with suitable examples from different aspects of our country.

Early Humans - I

1. Discuss the various ways in which early humans adjusted their lifestyle to survive in the Old Stone Age.
2. Highlight the connection between the making of stone tools and the improvement in hunting and gathering activities.
3. Explain the importance of fire in shaping the daily life and safety of early humans.
4. Illustrate the role of natural surroundings in deciding where early humans chose to live.

Early Humans - II

1. Describe the transformation in human life that came with the shift from food gathering to food production.
2. Outline the skills developed in the New Stone Age that contributed to a more settled and organised way of living.

3. Elaborate on how pottery became both a functional necessity and an artistic achievement in early settlements.
4. Discuss how cooperation and community living grew stronger during the New Stone Age period.

Studying the Past

1. Describe how monuments and inscriptions can help us understand the lifestyle of people in ancient times.
2. Explain how tools and pottery found during excavations can give clues about trade and culture.
3. Discuss how the study of coins can reveal information about rulers and their achievements.
4. Compare oral stories and written records as sources of history.
5. Illustrate the importance of preserving historical sources for the future generations.
6. Describe the role of historians and archaeologists in reconstructing the past.
7. Analyse how changes in language over time can be traced through historical records.
8. Discuss how paintings and sculptures help us learn about ancient beliefs and festivals.
9. Describe how different sources of history together form a complete picture of the past.

Oceans and Continents

1. Explain how the distribution of oceans and continents affects the climate of different parts of the world.
2. Describe how the movement of tectonic plates has shaped the arrangement of continents over millions of years.
3. Discuss the role of oceans in supporting human activities like trade, fishing, and tourism.
4. Compare the characteristics of the Pacific Ocean with those of the Atlantic Ocean.
5. Describe how the location of a continent can influence the kind of plants and animals found there.
6. Explain the importance of the Indian Ocean for the countries surrounding it.
7. Discuss how the size and location of Antarctica affect its climate and human habitation.
8. Describe how continents are connected historically through exploration and migration.
9. Explain the impact of ocean currents on weather patterns across the globe.
10. Discuss why preserving oceans and their resources is essential for future generations.

Locating Places on the Earth I and II

1. Why is the International Date Line not a straight line? How does this help in practice?
2. If two places have a time difference of 4 hours, calculate the difference in their longitudes and explain the reasoning.
3. Give a detailed description of how the shape of the Earth influences the creation and use of imaginary lines for finding places.
4. Develop an explanation about why the Prime Meridian was chosen at Greenwich and how it affects global time calculation.
5. Present an explanation of the role played by the Equator, Tropics, and Polar Circles in dividing and understanding the Earth's surface.
6. Create an account describing the relationship between longitude and time, including how time zones are determined.
7. Write an elaborate discussion on how modern technology like GPS uses the principles of latitude and longitude for practical purposes.
8. Create an account describing the relationship between longitude and time, including how time zones are determined.

Note: "A good reader becomes a smart problem-solver."
