Subject: SST

Chapter-13 The Earth And The Solar System

Q.I) New words:

- 1) Solar system
- 2) Planets
- 3) Around
- 4) Centre
- 5) Fixed
- 6) Orbit
- 7) Closest
- 8) Red planet
- 9) Bright
- 10) Satellite
- 11) Asteroids
- 12) Comets
- 13) Scientist
- 14) Galaxy
- 15) Star

Q.II) Answer the following questions.

Q.1) What does the solar system consist of?

Ans: The solar system consists of the Sun, eight planets, natural satellite or moons of the planets, asteroids and comets.

Q.2) How many planets are there in the solar system? Name them.

Ans: There are eight planets in the solar system. They are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

Q.3) Draw and label the solar system in your notebook.

Q.4) Where do the planets get light from?

Ans: The planets get their light from the sun.

Q.5) What are asteroids and comets?

Ans: There are chunks of rocks and metal found in the solar system. These are called asteroids.

A comet is a mass of ice, dust and rocky particles with a long tail.
