Parts of a Flower

- Label the parts of the flower.

- Choose the correct answer:

Functions	Flower parts
☼ Bright coloured part that attracts insects.	
☼ This is the part where pollen is produced.	
☼ The outer parts of the flower that protect the bud stage.	
☼ The part that develops into a seed when fertilized.	
☼ The part that supports the whole flower.	
☼ It protects the ovules and forms into fruits.	
☼ It receives pollen from the male part.
