Addition properties

Rule 1 → When 1 is added to a number, we get the number after it.

$$45 + 1 = 46, \quad 79 + 1 = 80$$

Rule 2 → When 0 is added to a number, we get the same number

$$60 + 0 = 60$$

$$23 + 0 = 23$$

Rule 3 → Numbers can be added in any order. The sum remains the same.

$$30 + 12 = 42 \quad \text{is the same as}$$

$$12 + 30 = 42$$
