* Subtraction Facts

1. When we subtract zero from a number, we get the number itself.

Examples: $12,390 - 0 = 12,390$ | $5,72,119 - 0 = 5,72,119$

2. When 1 is subtracted from a number, we get its predecessor.

Examples: $11,997 - 1 = 11,996$ | $3,98,002 - 1 = 3,98,001$

3. When a number subtracted from itself, the difference is zero.

Examples: $25,123 - 25,123 = 0$ | $6,71,593 - 6,71,593 = 0$

4. When 1, 100 or 1000 are subtracted from a number, the digit in the tens, hundreds or thousands place decrease by 1, respectively.

Examples: $88,888 - 1 = 88,887$ | $88,888 - 100 = 88,788$ | $88,888 - 1000 = 87,888$

Time to check 5

1. Fill in the boxes.

a. $84,567 - \boxed{1} = 84,566$

b. $6,543 - 0 = \boxed{6,543}$

c. $80,765 - 80,765 = \boxed{0}$

d. $\boxed{77,546} - 0 = 77,546$

e. $34,765 - 10 = \boxed{34,755}$

f. $4,987 - 1,000 = \boxed{3,987}$

g. $92,876 - 100 = \boxed{92,776}$

h. $7,543 - 1,000 = \boxed{6,543}$
