

Let's Think, Let's Decide

Q.6. What would you do in these situations? You can choose more than one answer. Remember to explain why you chose those answers.   

- 1) If you were stuck in the lift with just one other girl from your class whom you don't know very well, you would...
 - a) ...finish all your water without telling her or offering her any. ☐
 - b) ...tell her you're sorry you don't have a lot of water and you would like to save it for yourself. ☐
 - c) ...ignore her and wait in silence for the lift to be opened; after all, you aren't friends! ☐
 - d) ...strike up a conversation with her and realise you have more in common than you thought. ☒
- 2) If you see an older boy wasting water by throwing it out of the window, you would...
 - a) ...ignore him. If his friends aren't telling him anything, he probably won't listen to you either. ☐
 - b) ...tell him nicely that he shouldn't be wasting water since it is precious. ☒
 - c) ...walk up to him and snatch the bottle from his hand and order him not to waste water. ☐
 - d) ...tell a teacher or an adult that he is wasting water and let them handle the situation. ☐
- 3) If you see your father shaving while the water is running, you would...
 - a) ...not do anything. Adults are always right, they never do the wrong thing! ☐
 - b) ...turn the tap off and walk away without giving an explanation. ☐
 - c) ...tell your mother or another adult to explain to him why he should not leave the water running. ☒
 - d) ...organise a small 'family meeting' where all your family members come together to discuss ways to save water at home. ☒
- 4) On a very hot summer day, on your way home from school, you see a traffic policeman sweating on the street in the midst of the traffic. You would...
 - a) ...feel bad for him and walk away. ☐
 - b) ...go up to him and thank him for all the hard work he is doing on a hot day like this. ☐
 - c) ...walk up to him and offer a drink of whatever water is left in your bottle. ☒
 - d) ...ask your parent or whoever is with you if you could buy him a bottle of water. ☒
